

SKILLS: JavaScript, React, Redux, HTML, CSS, Ruby, Ruby on Rails, Mongoose, MongoDB, Node.js, Express.js, SQL, SQLite3, PostgreSQL, Webpack, jQuery, Git, Heroku

PROJECTS:

VacationsAway *Ruby on Rails, ReactJS*

[live](#) | [github](#)

A functional clone of AirBnB where users can book listings and write reviews of their favorite stays

- Implemented Google Maps API to filter location based on listings and user interactions with the map
- Created search and filter functionality to allow users to search for listings by name, location, or price range.
- Implemented CRUD functionality to allow users to read, create, edit, and delete reviews for listings they've stayed

Somashare *MongoDB, Express.js, React/Redux, Node.js*

[live](#) | [github](#)

This is a very short sentence about what your project does and the languages you used

- Implemented React Select library to allow search by topics via keyword or select via dropdown
- Handled User Authentication with Express to allow users to sign up/sign in.log in
- Backend collaboration with a team of 4 to to complete a Mongo backend with React Components

IcePuck *Javascript, HTML5 Canvas, SCSS*

[live](#) | [github](#)

- Implemented sphere on sphere/sphere on rectangle collision detection to simulate air hockey environment
- Use of HTML5 Canvas to create movement, design board, shapes, and create movement in a 2D fashion.
- Incorporated use of AI for the controller opponent to automatically hit the puck.
